Continuation of Substance of Interview including description of the general nature of what was discussed: The examiner telephoned Mr. Bailey to discuss the allowable subject matter. Mr. Bailey requested to present the suggested claims in writing. The suggested claims are provided in the Office action. The examiner notes that the currently claimed amylase has the amino acid sequence that differs from SEQ ID NO:2 by a single amino acid. Such change most likely will not change any properties recited in claims 29-33 and the recitation of them does not present the claimed invention in a better form.
